Report Overview

A sleeping bag is a bag used as a bed by those who engage in outdoor recreation activities such as camping, hiking, or climbing. It is similar to a blanket and used as a protection against wind, cold weather, and rain during outdoor expeditions. The camping sleeping bags vary in terms of size, insulation, and design. Two types of insulation materials are used to make camping sleeping bags: natural down fill and synthetic fill. Natural down fill bags weigh less and retain more heat, but they are costlier than synthetic fill bags and cannot be used in moist conditions. Synthetic fill bags absorb less water and are more resilient. However, they weigh more and cannot be compressed easily. This report studies the camping sleeping bags market.
