Outdoor fitness bicycles, commonly referred to as road or gravel bikes designed for athletic and recreational use, represent a category of two-wheeled human-powered vehicles optimized for performance, endurance, and versatility across varying terrains. These bicycles are characterized by lightweight frames, drop handlebars for multiple riding positions, narrow high-pressure tires for reduced rolling resistance, and advanced gearing systems to handle inclines and speed. Unlike casual or commuting bicycles, they prioritize aerodynamics, efficiency, and rider biomechanics, often incorporating materials such as carbon fiber, aluminum, or titanium.
