Report Overview:

LED retrofitting can be more cost effective in comparison to installing new lighting fixtures. The complexity of an LED lighting retrofit can vary greatly, from screwing in a new LED light bulb to a complete rewiring and new hardware for the fixture. This being said, it is usually relatively easy to upgrade from energy saving fluorescent lighting to LED lighting, as extensive rewiring isn’t required. It is also much less expensive than replacing the whole fixture, cutting the payback period of install, compared to that of buying new light fittings.

The Global Outdoor LED Retrofit Market Size was estimated at USD 1385.26 million in 2023 and is projected to reach USD 1867.01 million by 2029, exhibiting a CAGR of 5.10% during the forecast period.
