Report Overview

LED retrofitting can be more cost effective in comparison to installing new lighting fixtures. The complexity of an LED lighting retrofit can vary greatly, from screwing in a new LED light bulb to a complete rewiring and new hardware for the fixture. This being said, it is usually relatively easy to upgrade from energy saving fluorescent lighting to LED lighting, as extensive rewiring isn't required. It is also much less expensive than replacing the whole fixture, cutting the payback period of install, compared to that of buying new light fittings.
