## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Outdoor LED Step Light competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global Outdoor LED Step Lights production reached approximately 58 million units, with an average global market price of around US\$ 6.4 per unit. Outdoor LED Step Light is a specialized lighting fixture designed to illuminate exterior stairways, pathways, and steps for both functional safety and aesthetic enhancement. Utilizing light-emitting diode (LED) technology, these fixtures provide bright, energy-efficient illumination with minimal heat emission and long operational lifespans, often exceeding 50,000 hours. Housed in durable, weather-resistant materials such as aluminum, stainless steel, or high-grade polycarbonate, outdoor LED step lights are engineered to withstand exposure to rain, dust, and temperature variations, typically meeting IP65 or higher ingress protection ratings. They can be surface-mounted, recessed, or integrated into landscaping structures, and are often equipped with features such as motion sensors, dusk-to-dawn photocells, or adjustable color temperatures. By reducing the risk of trips and falls in low-light conditions, outdoor LED step lights serve a critical safety role, while their soft, low-glare output adds architectural definition and visual appeal to outdoor spaces. They are widely used in residential patios, garden walkways, public staircases, hotels, and commercial building entrances, offering a sustainable and low-maintenance lighting solution that aligns with modern energy-saving and design trends.

The global Outdoor LED Step Light market size was estimated at USD 372.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.60% during the forecast period.
