Report Overview

Outdoor polyester resin refers to the polyester resin that is mainly cured by TGIC (triglycidyl isocyanurate), HAA (?-hydroxyalkylamide) or IPDI (blocked isocyanate) in the production of powder coatings. High-grade powder coatings are mainly used outdoors, and the application fields include building materials, home appliances, construction machinery, automobiles, high-speed guardrails, etc., and need to have properties such as aging resistance and corrosion resistance. Due to the small amount of curing agent added in the production of powder coatings, outdoor polyester resin is also called pure polyester resin.
