Abstracts

Overband Magnetic Separators are industrial magnetic separation systems designed for the continuous and automatic removal of ferrous contaminants from bulk materials transported on conveyor belts. These systems typically consist of a self-cleaning electromagnet or permanent magnet suspended above the conveyor, generating a strong magnetic field that attracts and lifts ferrous metals from the material stream. They are widely used in recycling facilities, mining operations, quarrying, waste management, and various material processing industries to protect downstream equipment, improve product purity, and enhance operational safety by preventing damage from tramp metal.

The global Overband Magnetic Separator market size was estimated at USD 320.5 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 4.75% during the forecast period.
