Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on OWB Holsters competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. An OWB (Outside the Waistband) holster is a type of firearm holster designed to be worn on the outside of the pants, typically attached to a belt. OWB holsters securely hold a handgun close to the body but outside the clothing, making it easily accessible for drawing. These holsters are popular among both law enforcement personnel and civilians who prefer carrying their firearms openly or need quick access to their weapon. OWB holsters come in various materials such as leather, Kydex, or nylon, and offer different retention mechanisms to ensure the firearm stays in place until deliberately drawn by the user. In 2024, global OWB Holsters production reached approximately 26940 k units, with an average global market price of around US\$ 50 per unit. The production capacity of OWB Holsters reaches 29933 k units, and the industry's gross profit margin is approximately between 30% and 50%. The growth of the OWB holster market is primarily driven by rising global demand for personal defense, the relaxation of concealed carry laws, and the modernization of law enforcement and military equipment. With increasing public safety awareness and the implementation of license-free carry policies in some countries and regions, civilian demand for comfortable and reliable OWB holsters has grown significantly. Furthermore, the continuous upgrading of individual equipment by law enforcement agencies and the military has driven the development and procurement of high-security, rapid-response tactical holsters. Furthermore, advances in materials science and ergonomic design have continuously optimized holsters in terms of lightweight, durability, concealability, and draw efficiency, further stimulating product iteration and market expansion.

The global OWB Holsters market size was estimated at USD 1347.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.50% during the forecast period.
