Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on p-Acetoxystyrene competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global p-Acetoxystyrene production reached approximately 516 tons, with an average global market price of around US\$ 159 per kg. p-Acetoxystyrene is a styrene-based monomer. Structurally, it is derived from 4-vinylphenol by acetylation of the para-hydroxyl group, forming an acetoxy substituent ($-OCOCH_3$). It is a colorless transparent liquid capable of undergoing free-radical and controlled radical polymerizations to produce poly(p-acetoxystyrene). The polymer can be hydrolyzed to poly(p-hydroxystyrene), a key resin in electronic chemicals, particularly photoresist formulations. The market positioning of p-Acetoxystyrene lies primarily in its role as a protected precursor to poly(p-hydroxystyrene), widely applied in semiconductor photoresists and microelectronic materials. Photoresist formulations demand strict control over resin properties such as solubility, thermal stability, and film-forming ability. Poly(p-acetoxystyrene), upon hydrolysis, yields high-purity phenolic polymers, making it the preferred synthetic route in the industry. With the continued scaling of semiconductor nodes and the advancement of flat-panel display technologies, demand for this monomer is expected to grow steadily. Although its consumption volume is limited compared to bulk monomers, its value is significantly higher due to its critical role in high-end electronic chemicals. As the photoresist industry expands in Asia, regional demand for p-Acetoxystyrene is projected to become increasingly important.

The global p-Acetoxystyrene market size was estimated at USD 82.04 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.80% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global p-Acetoxystyrene market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights.
