PA nylon bellows have good elasticity and are easy to curl. It is mainly used for wiring of electronic, new energy automotive wiring harness bellows, wire and cable, machinery and construction industry to protect the power supply or cable from external force scratches, achieve good protection of the protective line and enhance the aesthetics. In use, to a large extent, it is only necessary to thread a wire or cable into the tube and then lock the head. The nylon bellows are made of PA6 nylon or PA66 nylon. Ordinary nylon bellows are divided into standard and flame retardant types. Standard nylon bellows are generally black, white, orange, yellow, etc., and the interior and appearance are wavy. In the process of threading, it can also be cut open and the operation is more convenient. Flame retardant nylon bellows are also usually black. In addition to the characteristics of standard nylon hoses, flame retardant nylon bellows have better lubricity, higher frictional resistance, faster rebound recovery, and fire retardant to accommodate higher temperature operating conditions.
