## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on PAC Automatic Dosing Device competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global production of PAC automatic dosing devices reached 97,000 units, with an average selling price of US\$6,811 per unit. PAC automatic dosing devices are automated equipment used in water treatment processes to precisely add polyaluminum chloride (PAC) flocculant. They can automatically dilute, mix, and quantitatively add PAC, improving the efficiency and effectiveness of water purification, turbidity removal, and sterilization. The PAC automatic dosing system mainly consists of a solution tank, a mixing tank (with agitator), a metering pump, a level gauge, an electrical control cabinet, pipelines, valves, safety valves, check valves, pressure gauges, filters, a base, and a ladder. It utilizes the neutralization and adsorption bridging effects of PAC to destabilize and aggregate tiny suspended particles and colloidal substances in water, forming easily separable flocs. It is applied in municipal water supply and drainage, industrial wastewater (papermaking, textile printing and dyeing, chemical, food and beverage, steel mining/coal preparation/tailings return water), sludge dewatering pre-dosing, circulating cooling, and greywater reuse. Upstream components include PAC chemicals and auxiliaries, metering pumps and motors, agitators/feeders and humidifiers, sensors and valves, etc.; downstream applications include municipal water departments and various industrial sectors requiring water treatment, such as petroleum, chemical, papermaking, food, and mining. The industry's gross profit margin is approximately 20-30%.

The global PAC Automatic Dosing Device market size was estimated at USD 661.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of

6.10% during the forecast period.
