Report Overview:

Pacifiers & Teethers are intended for a young child to suck on, but that is not designed to help a baby obtain fluid. It usually has a guard or shield at the base that keeps the pacifier from being sucked completely into a child's mouth. It also has a handle or ring, usually on the opposite side of the guard, which is used to hold or grasp the pacifiers & teethers.

Driven by 'natural' and 'Silicone' products, global baby pacifiers and teethers market is seeing marketing strategies aimed at the emotional appeal of parents rather than logical and point-based appeal. The end-user of this market are parents, who are always concerned about getting the best and the safest products for their children. The prospects for growth in this market are bolstered by the launch of products that are organic in nature.
