Abstracts

Painting Tapes is a type of pressure-sensitive tape made of a thin and easy-to-tear paper, and an easily released pressure-sensitive adhesive. It is available in a variety of widths. It is used in painting, to mask off areas that should not be painted. The adhesive is the key element to its usefulness, as it allows the tape to be easily removed without leaving residue or damaging the surface to which it is applied. The tape is available in several strengths, rated on a 1?100 scale based on the strength of the adhesive. Most painting operations will require a tape in the 50 range. Household masking tape is made of an even weaker paper and lower-grade adhesive. North America is the largest Painting Tapes market with about 38% market share. Europe is follower, accounting for about 27% market share. The key players are 3M Company, Nitto Denko Corp, Beiersdorf (Tesa), Shurtape Technologies, Berry Global, Intertape Polymer Group, Scapa Group PLC, Saint-Gobain, Bolex, Advance Tapes etc. Top 3 companies occupied about 26% market share.
