Abstracts

Pallet Wrapping Film is a type of plastic film that can be stretched, either by hand or wrapping machine, around a pallet. While it is most often used to secure goods for transportation, pallet wrap has many other uses. For example, it can be used in horizontal spiral wrapping machines to bundle or protect a range of goods and freight items. This technique is widely used for aluminium extrusions and timber moulding to wrap and bundle together. It's also a popular method of bundling flat pack cabinets in the kitchen industry. The packaging industry, including pallet wrapping film, has been witnessing a growing demand for sustainable and eco-friendly solutions. Companies and consumers are increasingly concerned about reducing plastic waste, which may lead to a rise in the adoption of environmentally friendly pallet wrapping films.
