### Report Overview

Paper cutting machines revolutionized the world of scrapbooking, Signs & Cards Making and other applications for consumer graphic design. Instead of having to purchase components such as stickers, letters, die cuts and shapes, a paper cutting machine allows you to make your own components to use on signs, scrapbooks, pictures and other applications.

Paper cutting machines generally work the same way that commercial graphics cutters do, only on a smaller scale: you enter the computerized image into the machine, and the machine's hard drive retrieves the image and cuts it on the included paper. Cutting machines work similarly to printers, only instead of printing images with ink or a laser, they use a micro blade to score the image into paper and make precise cuts.
