Abstracts

A paper towel is an absorbent towel made from tissue paper instead of cloth. Unlike cloth towels, paper towels are disposable and intended to be used only once. Paper towels soak up water because they are loosely woven which enables water to travel between them, even against gravity (capillary effect). Paper towels can be individually packed (as stacks of folded towels or held coiled) or come in rolls. Paper towels have similar purposes to conventional towels, such as drying hands, wiping windows, dusting, and cleaning up spills.

The global Paper Towels market size was estimated at USD 14560.0 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 0.05% during the forecast period.
