### Report Overview

Pilot headsets come in two basic flavors: active noise reduction (ANR) and passive noise reduction (PNR). PNR is more like soundproofing your garage when you're in a band: it blocks damaging noise by stopping it with barriers. These headsets rely on clamping mechanisms to keep the ear cups sealed against the wearer's head. The cups completely cover the ears, and dense foam inside the ear cups absorbs sound while gel ear seals conform around the ear to stop sound waves.
