Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on PCIe 5.0 Retimer Chip competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. PCIe 5.0 retimer chips are key components for reshaping and retiming PCIe 5.0 data transmission signals in high-speed signal chains. They effectively compensate for signal attenuation and jitter caused by long links and connectors, improving system signal integrity and reliability. They are core components for high-speed interconnects in servers, storage devices, high-performance PCs, and AI computing platforms. Global sales in 2024 are expected to reach approximately 12 million units, with an average unit price of approximately US\$9.50. Annual production capacity per line is approximately 1 million units, with a gross profit margin of approximately 38%. Its upstream companies are primarily engaged in high-speed analog IC design, wafer foundry, packaging and testing, and substrate manufacturing. Its downstream customers are primarily server motherboard manufacturers, storage controller card manufacturers, and complete system manufacturers. The product cost structure consists of wafer manufacturing and front-end processes accounting for approximately 40%, packaging and testing approximately 25%, high-speed SerDes circuit design and verification approximately 20%, and management and other costs approximately 15%. Classification by parameters mainly includes signal rate classification such as 32GT/s and 64GT/s models, channel number classification such as 8 channels, 16 channels and 32 channels, interface compatibility classification such as PCIe dedicated type and PCIe/CXL dual model, operating temperature and reliability classification such as standard type and wide temperature industrial type, and packaging form classification such as BGA packaging and chiplet embedded type.

The global PCIe 5.0 Retimer Chip market size was estimated at USD 114.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 8.90% during the forecast period.
