Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on PDE-4 Inhibitors competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. PDE-4 inhibitors are primarily used in the treatment of inflammatory and immune-mediated diseases, such as asthma, chronic obstructive pulmonary disease (COPD), psoriasis, and rheumatoid arthritis. Their development and production rely heavily on high-purity active pharmaceutical ingredients (APIs), such as apremilast and roflumilast, with upstream raw materials mainly supplied by fine chemical manufacturers and specialized API producers from Europe, the US, and India. The manufacturing process also requires excipients such as lactose, microcrystalline cellulose, hydroxypropyl methylcellulose, and magnesium stearate to ensure drug stability and bioavailability. Downstream customers are concentrated among pharmaceutical companies, hospitals, specialty clinics, and retail pharmacies, spanning from prescription-driven markets in developed countries to public healthcare systems in emerging economies. Since PDE-4 inhibitors are often prescribed for long-term use to maintain therapeutic benefits, demand is characterized by large patient populations and extended treatment cycles, placing high requirements on manufacturers' supply reliability. Moreover, with the ongoing expansion of therapeutic indications, several companies are actively promoting PDE-4 inhibitors in dermatology and rheumatology, providing new drivers for diversified market growth. In 2024, the global average price of PDE-4 inhibitors is approximately USD 25.4 per unit (with "unit" referring to one oral tablet or one injectable), with total sales reaching about 202 million units.

The global PDE-4 Inhibitors market size was estimated at USD 5143.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.40% during the

forecast period.
