Report Overview

The performance and life of PDP mainly depend on the nature of the phosphor and its resistance to violent ion and electron release and VUV radiation. PDP phosphors are developed from phosphors for traditional lamps. Due to the special wavelength of VUV used to illuminate the phosphor, only a few lamp powders are suitable for PDP. In addition to high luminous efficiency, PDP phosphors are also required to have appropriate color coordinates, color temperature, color saturation, stability and lifetime
