PEEK heat shrink tubing is a type of heat shrink tubing made from high-performance PEEK (polyetheretherketone) plastic. It utilizes the excellent properties of PEEK material to provide protection for electronic components and connectors, especially suitable for applications in harsh environments, such as solving problems such as wear, high pressure, corrosion, chemical erosion, and electronic interference. Its main advantage is that it has a wide working temperature range and can replace traditional plastic solutions. PEEK heat shrink tubing provides an ideal protection solution for sensitive components and some high demand connectors. It can be used in harsh environments such as oil and gas, and can solve threats to electronic components such as wear, high pressure, corrosion, chemical erosion, moisture, or electronic interference. It can replace traditional fluoroplastic solutions and has a wide working temperature range. In 2024, global PEEK Heat Shrink Tubing production reached approximately 5,342 MT, with an average global market price of around US\$ 69,446 per MT. The annual production capacity of a single production line is 500 tons, and the gross profit margin is about 50%. Upstream raw materials: PEEK resin, colorants. Downstream applications: automobile manufacturing, electronics and electrical, medical equipment, aerospace, nuclear power and military industry. Direct material costs are about 60%-70%; labor costs are about 5%-15%; manufacturing expenses are about 15%-25%.

The global PEEK Heat Shrink Tubing market size was estimated at USD 371.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.30%
