Report Overview

Peelable pouches are flexible packaging solutions designed for easy opening, typically featuring a resealable or peelable layer that allows consumers to access the contents without requiring scissors or excessive force. These pouches are widely used in industries such as food and beverage, pharmaceuticals, personal care, and pet food due to their convenience, lightweight properties, and ability to extend product shelf life through barrier protection against moisture, oxygen, and contaminants. The market for peelable pouches is growing due to increasing consumer demand for portable, single-serve, and on-the-go packaging, as well as rising preferences for sustainable and recyclable materials.
