Report Overview

Several types of antibiotics can cure PID. Antibiotic treatment does not, however, reverse any scarring caused by the infection. For this reason, it is critical that a woman receive care immediately if she has pelvic pain or other symptoms of PID. Prompt antibiotic treatment can prevent severe damage to the reproductive organs. The longer a woman delays treatment for PID, the more likely she is to become infertile or to have a future ectopic pregnancy because of damage to the fallopian tubes.
