Report Overview

Pendant crane button stations are a series of simple switches that control much larger electrical loads through various means. This causes the machine to move to and from the desired point. A pendant control hangs down from the hoist or off of a separate festoon track and allows the operator to control the crane and the load as it moves down the runway. A handheld controller with push buttons is directly wired into the hoist or a separate festoon track and hangs down to be used by the operator.

The global Pendant Crane Button Stations market size was estimated at USD 385.2 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 4.85% during the forecast period.
