Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Peroxide-cured Fluoroelastomer competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Peroxide-cured Fluoroelastomer is a high-performance elastomer that uses an organic peroxide to promote the vulcanization (or curing) reaction, imparting excellent heat and chemical resistance, as well as superior mechanical properties. Unlike conventional sulfur-cured fluororubbers, peroxide-cured systems do not contain inorganic bases, resulting in improved acid, water, and steam resistance. It is commonly used in industries such as petrochemicals, automotive, and aerospace. Global peroxide-cured fluororubber production is expected to reach approximately 8,500 tons in 2024, with an average selling price of US\$45,000 per ton. Peroxide-cured fluoroelastomer primarily relies on hydrofluoric acid and fluorinated monomers (such as vinylidene fluoride (VDF), hexafluoropropylene (HFP), tetrafluoroethylene (TFE), and perfluoromethyl vinyl ether (PMVE), as well as organic peroxide crosslinkers and fillers such as carbon black/silica. Price fluctuations and supply stability of upstream raw materials have a direct impact on midstream production. Peroxide-cured fluoroelastomer, a key sub-segment of the fluororubber industry, has shown steady growth in recent years, primarily driven by expanding demand from the downstream high-end equipment manufacturing industry. Fluororubber materials are processed into various end products, including seals (O-rings, gaskets), hoses, and tapes, for use in demanding industrial sectors such as semiconductors, automotive, aerospace, and petrochemicals.

The global Peroxide-cured Fluoroelastomer market size was estimated at USD 383.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of

4.80% during the forecast period.
