PET Banding or PET strapping, Polyester strapping, is characterized by a very consistent tensile strength and very high elongation. Characteristics that are most decisive factor for a safe and reliable strapping method. Unlike strapping made from steel, Polyester strapping having its very high elongation, is able to absorb shocks and impacts during transportation and handling far better than steel strapping is capable of. The excellent elongation allows the substitution for the same application with Polyester strap having a lower breaking strength.
