Abstracts

A pet bottle washing line refers to an industrial-scale system designed for the cleaning, decontamination, and recycling of used polyethylene terephthalate (PET) bottles, which are commonly used for beverages, personal care products, and household chemicals. This equipment typically involves multiple stages, including pre-sorting, crushing, hot washing, friction cleaning, rinsing, and drying, to remove labels, adhesives, residues, and microorganisms, transforming post-consumer PET bottles into clean flakes or pellets that meet quality standards for reuse in manufacturing food-grade or non-food-grade products. The process is integral to the circular economy, enabling bottle-to-bottle recycling or repurposing into fibers, sheets, or other plastic items while adhering to environmental and hygiene regulations.

The global Pet Bottle Washing Line market size was estimated at USD 235.6 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 4.80% during the forecast period.
