Abstracts

Contract manufacturing of pet care products is a cooperative model in which the brand or designer (usually referred to as the "client") and the manufacturer with production capacity and resources (i.e., the "OEM") work together to produce pet care products. In contract manufacturing of pet care products, the client is mainly responsible for providing core elements such as product formula, production process requirements, raw materials (sometimes the OEM is also entrusted to purchase), and packaging design. The OEM is responsible for a series of production activities such as raw material procurement and inspection, production and processing, quality control, product packaging, and delivery based on the specific needs of the client. The two parties clarify their respective rights, obligations, and responsibilities by signing a detailed contract to ensure the smooth progress of cooperation.

The global Pet Care Products Contract Manufacturing market size was estimated at USD 3375.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.00% during the forecast period.
