Report Overview:

Animal Shampoo is a specialized animal care product that cleanses, conditions, and deodorizes animals' coat and skin. Animals often get dirty and soiled, due to their outdoor movements, wandering and lying on dirty surfaces and hence need to be cleaned occasionally. The most common animals around the globe are dogs and cats, who have a hairy coating and hence are prone to getting infected with flea and ticks. This also increases the risk of growth of bacteria in their bodies. Animal Shampoos are manufactured, taking into consideration the pH value of animal skin and hence are a lot milder than human shampoos. Additionally, most shampoos are medicated to treat a range of animal problems such as fleas, ticks, dandruff, skin issues and so on. Since they are medicated, it is recommended to leave the shampoos on the skin for five to ten minutes before rinsing off. These shampoos often form less lather, due to the limited use of sulfate, in order to suit their sensitive skin. Manufacturers are formulating new and innovative products to make the Animal Shampoos more effective and suitable for the required animal skin or hair. The usage of these shampoos regularly makes the animal hair soft and shiny.

The Global Pet Medicated Shampoo Market Size was estimated at USD 526.34 million in 2023 and is projected to reach USD 639.54 million by 2029, exhibiting a CAGR of 3.30% during the forecast period.
