Abstracts

Pet SPA service is a comprehensive care service designed specifically for pets, aiming to improve the health, comfort and appearance of pets through hydrotherapy, massage, beauty, etc. Similar to human SPA, pet SPA emphasizes relaxation, cleaning and maintenance, but will be professionally adjusted according to the physiological characteristics of pets. In mature markets like North America and Europe, premiumization and personalization are key trends. Pet owners prefer naturally formulated grooming products and have strong demand for holiday-themed styling and comprehensive grooming services. The Asia-Pacific region is the fastest-growing region globally, with a projected compound annual growth rate of 8.51%. Consumers in this region particularly prioritize frequent cleaning and aesthetic styling, fostering a complex demand for both grooming and beauty. Markets like India are also experiencing rapid growth at an annual rate of approximately 12%, with mobile home grooming services and boutique salons offering organic products becoming increasingly popular. Products and services are expanding beyond basic cleansing to include "health and wellness." Functional products targeting specific needs, such as skin repair, fur care, and insect repellent, are gaining traction. Affordable luxury services such as aromatherapy and pet manicures are popular among middle- and upper-income individuals, making pet grooming a form of aesthetic and emotional expression.

The global Pet SPA Service market size was estimated at USD 5294.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 8.30% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Pet SPA Service market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging

development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.
