Abstracts

Breeding and managing pets is a responsible and complex task that requires careful planning, ethical considerations, and a commitment to the well-being of the animals involved. Responsible breeders carefully select mating pairs based on health, temperament, and breed standards. They screen the parents for genetic and hereditary diseases to reduce the risk of passing on genetic defects to the offspring. Prior to breeding, both male and female pets should undergo comprehensive health testing. This includes tests for common genetic diseases that are prevalent in the breed. Health testing helps ensure that the mating pair is healthy and decreases the likelihood of disease transmission to the offspring. Responsible breeders carefully screen potential buyers and ensure that their puppies or kittens are going to suitable and loving homes. They also provide guidance and support to new owners in terms of healthcare, training, and responsible pet ownership.

The global Pets Breeding Management market size was estimated at USD 1769.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.00% during the forecast period.
