## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on PFA Corrugated Pipe competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. PFA corrugated pipe is a high-performance plastic pipe made of perfluoroalkoxy resin as the core material, and its unique feature lies in the carefully designed corrugated texture on the surface. This design not only significantly improves the flexibility and extensibility of the pipe, but also demonstrates excellent sealing and compressive performance under extreme working conditions. The inherent chemical stability, high and low temperature resistance, corrosion resistance, low friction coefficient, and excellent electrical insulation of PFA material endow PFA corrugated pipes with outstanding performance in complex environments, making them a leader in the field of pipeline transportation and protection. PFA corrugated pipes come in a wide range of colors, including transparent, black, and various colored styles, to meet the visual and functional needs of different scenarios. Yellow, brown, green, blue, and other colors are relatively rare, providing personalized choices for specific applications. In 2024, global PFA Corrugated Pipe production reached approximately 1658 K m, with an average global market price of around US\$ 41 per m. The production capacity of a single production line is 50 kilometers, and the gross profit margin is about 45%. Upstream raw materials: perfluoroalkoxyalkane (PFA) resin. Downstream applications: electronic and electrical engineering; food industry; medical care; semiconductor industry; chemical industry. Direct material costs account for 50%-60%; labor costs account for 5%-10%; manufacturing expenses account for 30%-40%.

The global PFA Corrugated Pipe market size was estimated at USD 68.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.10% during the

forecast period.
