## Abstracts

Pharma Grade Rigid PVC Composite Film is a high-performance material meticulously engineered for pharmaceutical packaging applications. It is centered around polyvinyl chloride (PVC) as the fundamental component and is fabricated through a combination of advanced technologies and other compatible materials to form a composite structure. This composite film exhibits remarkable rigidity and strength that far exceed those of ordinary packaging materials. Throughout all the processes of drug circulation, be it during bumpy transportation, stacked storage, or frequent handling and sales, it offers steadfast protection to the enclosed medications. It shields them from external forces like compression and impact, effectively maintaining the original forms of solid pharmaceuticals and preventing tablets from crumbling or capsules from deforming.

The global Pharma Grade Rigid PVC Composite Film market size was estimated at USD 679.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.90% during the forecast period.
