Report Overview:

Track and trace solutions are not just economic measures for supply-chain efficiency. Experts estimate that 5% of all drugs sold worldwide are counterfeits – in some countries, figures even reach a shocking 50 %. Billions of products are “lost in the supply chain” every year. Counterfeit drugs and product diversion risk lives, undermine revenues, and threaten company reputations. The pharmaceutical industry needs to ensure supply-chain security and gain the ability to authenticate the ePedigree, or life history, of a product.

Track and trace solutions are an essential part of this strategy. Track and trace solutions identify the origins of a pharmaceutical industry product and verify its authenticity. Moreover, track and trace solutions also help combat product diversion, whereby legitimate products are diverted from one market to another, with implications for licensing obligations and distribution agreements as well as for revenues.

The Global Pharma Track and Trace Solutions Market Size was estimated at USD 1954.72 million in 2023 and is projected to reach USD 4640.62 million by 2029, exhibiting a CAGR of 15.50% during the forecast period.
