Abstracts

Pharmaceutical glass packaging bottles are specialized containers designed for storing and transporting pharmaceutical products. They are typically made from neutral borosilicate glass or low borosilicate glass, ensuring excellent chemical stability, high-temperature resistance, and airtightness. These bottles are widely used for packaging injections, infusions, lyophilized powders, and oral solutions. Their transparency allows for easy observation of the contents, while effectively preventing moisture, oxidation, or chemical reactions with the container. Depending on the application, pharmaceutical glass packaging bottles include ampoules, vials, and infusion bottles, all manufactured under strict quality control standards to ensure the safety and efficacy of the pharmaceuticals.
