## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Pharmaceutical Laminated Tubes competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Pharmaceutical laminated tubes are packaging tubes made from multilayer composite materials, typically combining polymer films, aluminum foil, and coating layers, used for ointments, gels, oral preparations, and other topical medications. The composite structure provides excellent barrier properties, effectively protecting active pharmaceutical ingredients from light, oxygen, and moisture, while ensuring stability and safety during storage and transportation. Upstream raw materials include high-performance polymers such as polyethylene and polyester, aluminum foil, and pharmaceutical-grade coating materials. Leading global suppliers include DuPont, BASF, Sumitomo Chemical, and Toray, providing high-quality composite films and coatings that meet pharmaceutical standards. Downstream customers are primarily pharmaceutical manufacturers, medical device companies, and some cosmetics companies, particularly those producing ophthalmic drugs, dermatological preparations, topical antimicrobials, and oral care products. Major multinational clients include GlaxoSmithKline (GSK), Sanofi, and Bayer, alongside small- and medium-sized manufacturers in China and India. Pharmaceutical laminated tubes are widely used in the global pharmaceutical market due to their superior barrier performance, plasticity, and printability, and the demand for high-quality, environmentally friendly laminated tubes continues to grow as regulatory standards for drug safety and sustainability increase. In 2024, the global average price of pharmaceutical laminated tubes was approximately USD 0.18 per unit, with a total sales volume of around 4.28 billion units.

The global Pharmaceutical Laminated Tubes market size was estimated at USD 770.0

million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.80% during the forecast period.
