Abstracts

Pharmaceutical sweeteners are specialized sugar substitutes incorporated into medicinal formulations to enhance palatability, mask bitter or unpleasant tastes of active pharmaceutical ingredients, and improve patient compliance, particularly in pediatric, geriatric, and chronic disease populations where long-term medication adherence is critical; these sweeteners must meet stringent regulatory standards for safety, stability, and non-interference with drug efficacy, and include both high-intensity sweeteners (e.g., aspartame, sucralose, saccharin) and bulk sweeteners (e.g., sorbitol, mannitol), often selected based on compatibility with the drug's chemical properties, desired sweetness profile, and dosage form (such as syrups, chewable tablets, or orally disintegrating films). The global pharmaceutical sweeteners market is characterized by steady growth, driven by increasing demand for patient-friendly drug formulations, expansion of the generic pharmaceuticals sector, and rising health consciousness regarding sugar intake; key market players include Roquette Freres, Cargill, Ingredion, Archer Daniels Midland Company, and DuPont, who focus on developing innovative, multifunctional sweetening agents that also act as excipients for stability or bioavailability enhancement. Regional dynamics show North America and Europe as dominant markets due to strict regulatory frameworks and high healthcare standards, while Asia-Pacific is emerging as a high-growth region fueled by expanding pharmaceutical manufacturing, growing generic drug production, and increasing healthcare expenditure. Challenges include regulatory hurdles, the need for extensive safety testing, and shifting consumer preferences toward natural sweeteners like stevia and monk fruit extracts, which are gaining traction but require further research to ensure compatibility and stability in pharmaceutical applications.

The global Pharmaceutical Sweeteners market size was estimated at USD 1085.5 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of

5.20% during the forecast period.
