Report Overview

Pharmacy Benefit Management (PBM) refers to third-party administrators that act as intermediaries between insurers, pharmacies, and pharmaceutical manufacturers to manage prescription drug benefits on behalf of health plans, employers, and government programs. PBMs are responsible for negotiating drug prices with manufacturers, developing formularies, processing claims, and implementing cost-containment strategies such as mail-order pharmacies, generic substitution, and utilization management. Their role is critical in optimizing drug spending while ensuring patient access to medications, leveraging their scale to secure rebates and discounts that lower costs for payers. However, PBMs operate in a complex and often opaque pricing environment, facing scrutiny over their influence on drug pricing and potential conflicts of interest. The industry is dominated by a few large players, including CVS Caremark, Express Scripts, and OptumRx, which control a significant share of the market, though smaller PBMs and insurer-owned entities also compete. With rising drug costs and regulatory pressures, PBMs are increasingly under the spotlight to demonstrate transparency and value in the pharmaceutical supply chain.

The global Pharmacy Benefit Management PBM market size was estimated at USD 557163.83 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 5.76% during the forecast period.
