### Report Overview

Photovoltaic glass refers to the glass used on the solar photovoltaic cell module, which is the front of the cell module. It can ensure a high transmittance to make the solar cell receive solar radiation and generate electricity, and can play a protective role for the solar cell and prolong its life. The photoelectric conversion efficiency of the photovoltaic cell will be reduced due to the absorption and reflection of sunlight by the photovoltaic glass, which requires the photovoltaic glass to continuously improve the transparency. The transparency of the photovoltaic glass depends on the iron content of the glass. Calendered glass is a subdivision of photovoltaic
