Report Overview

Tube Bundle Dryer (Pipe Bundle Dryer) is the indirect heated, contact type drying machine which can be both parallel flow and the counter-flow drying. The tube bundle dryer is a rotary drum internally equipped with steam or thermal oil heated tubes, so hot gas circulation is not required. This results in a very high thermal efficiency and a minimal flow of exhaust steam needing to be treated. It is especially suitable for large flows of products which require medium to long residence times. Highly flexible, the tube bundle dryer easily adapts to changes in operation and is of very robust construction. Excellent product treatment, uniform drying without lumps.
