It is suitable for memory loss and mild to moderate brain dysfunction caused by various reasons such as acute and chronic cerebrovascular diseases, brain trauma, and various toxic encephalopathy. It is also used for children with mental retardation. Brain diseases have always been one of the most difficult areas for human beings to conquer. There are constant disputes over whether neuroprotective agents are life-saving drugs or panacea. The neuroprotective drug market is greatly influenced by evidence-based drug use and related policies. New drugs such as butylphthalide and edaravone dexaborneol are developing rapidly, and after the decline of many old drugs such as edaravone, oxiracetam, and gangliosides, they have taken over and become Dinghaishenzhen among neuroprotective drugs. In addition, piracetam, which is a gamma-aminobutyric acid analogue like oxiracetam, has also been recommended by multiple guidelines, bucking the trend and achieving market growth.

The global Piracetam Injection market size was estimated at USD 4807.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 37.30% during the forecast period.
