## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on ?Pitch Drive Gearbox competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. ?Pitch Drive Gearbox is the core transmission device in the pitch system of wind turbine, which is mainly used to accurately adjust the angle of wind turbine blades to adapt to different wind speed conditions, so as to optimize the wind energy capture efficiency and ensure the safe operation of the unit. Market Concentration and Major Players: Internationally, the market concentration of wind power pitch reducer is relatively high, mainly concentrated in developed countries such as Europe, America and Japan. For example, Bonfiglioli and Liebherr and other large manufacturers; from the domestic point of view, the manufacturers of wind power pitch reducer include Yinchuan Weili Transmission and Chongqing Gear Box and other enterprises. Manufacturing Processes and Market Trends: The manufacturing process of wind power pitch reducer takes multi-stage planetary gear transmission as the core, adopts high-strength alloy steel forgings, through more than 20 processes such as forging, normalizing, carburizing and quenching, and realizes micron precision control by relying on five-axis CNC machining center. The key spiral bevel gear needs to correct heat treatment deformation through grinding process to ensure meshing accuracy. The manufacturing difficulty lies in solving the problems of sun gear floating design and planet carrier load sharing, and ensuring 20 years service life through 20MPa pressure test and 2 million fatigue verification. The market trend shows structural upgrading of demand: the proportion of large-scale fans driving more than 5MW models increases, and the value of single units increases; the intelligent penetration rate accelerates, and the products integrated with temperature and vibration sensors realize predictive maintenance; the localization rate decreases, and the head enterprises seize

the share through process optimization. Prices continue to fall due to technology maturity, but the market size is expected to increase in 2028, mainly due to the expansion of offshore wind power demand and lightweight materials application.

The global ?Pitch Drive Gearbox market size was estimated at USD 544.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 10.50% during the forecast period.
