Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Pizza Stone Tiles competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Pizza Stone Tiles are flat, heat-resistant tiles made from materials like cordierite, ceramic, or refractory stone, designed to replicate the conditions of a traditional brick oven. These tiles are used in home ovens or grills to evenly distribute heat and absorb moisture, resulting in crispier pizza crusts. Their thermal mass and ability to retain high temperatures make them ideal not only for baking pizzas but also for bread, flatbreads, and other baked goods that benefit from a hot, dry surface.
