Report Overview

Caps and Closures are an important part of packaging and containers such as bottles, cans, tubes, stand-up Pouches and others. Often, they do not only serve to open the container, but also offer the option to reseal it.

Due to the fragile properties of glass and its high cost, the demand for glass bottles is decreasing throughout the world and its place is being taken by plastic bottles and containers. PET bottles are being preferred over glass as they are easy to transport over long distances and to avoid breakages.
