Plug-in mosquito killers are electronic devices designed to attract, trap, or eliminate mosquitoes using various mechanisms, such as UV light, heat, carbon dioxide simulation, or chemical attractants combined with an electric grid or adhesive surface. These devices are typically powered by standard electrical outlets, making them convenient for indoor use in residential, commercial, or hospitality settings. Their primary function is to provide a chemical-free or low-chemical alternative to traditional insect repellents like sprays or coils, targeting users seeking safer, continuous protection against mosquito-borne nuisances or diseases.
