## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on pMDI Canisters competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. pMDI canisters are the core containers used in pressurized metered-dose inhalers, typically made of aluminum or stainless steel and manufactured using deep-drawing processes with surface coatings to enhance corrosion resistance and drug compatibility. Common sizes include 10ml, 14ml, and 19ml, with some suppliers such as Anomatic offering customized dimensions and surface treatments. Major global manufacturers include Anomatic, Pressteck, Kindeva, and Presspart, with an estimated total global capacity of approximately 0.6 billion units in 2024. Key upstream materials include aluminum, stainless steel, and functional coatings. Downstream customers are primarily pharmaceutical companies and medical device manufacturers, including Pfizer, AstraZeneca, Novartis, and H&T Presspart. The gross margin of pMDI canisters typically ranges from 20% to 25%, influenced by raw material costs, manufacturing processes, and market demand. The global pMDI canister market is experiencing trends toward sustainability and technological innovation, with increasing demand for environmentally friendly canisters with low global warming potential. The rise of smart inhalers is placing higher demands on canister technology and quality, while global supply chain and geopolitical factors may impact raw material supply and production capacity. The market is expected to continue growing steadily to meet ongoing demand for respiratory disease treatment and chronic disease management. In 2024, the global market for pressurized metered-dose inhaler (pMDI) canisters had an average price of USD 0.65 per unit, with a total sales volume of 0.43 billion units.

The global pMDI Canisters market size was estimated at USD 279.0 million in 2025 and
