Abstracts

The market for Point-of-Care (POC) immunoassay analyzers has been experiencing significant growth and is expected to continue to do so in the coming years. This trend can be attributed to several factors: Increasing prevalence of infectious diseases: The global burden of infectious diseases, such as COVID-19, HIV, and hepatitis, has been driving the demand for rapid and accurate diagnostic testing. POC immunoassay analyzers offer the advantage of providing quick results at the point of care, enabling timely diagnosis and treatment. Growing demand for decentralized healthcare: POC testing offers the convenience of testing patients outside of traditional laboratory settings, such as in clinics, emergency rooms, and homes. This decentralized approach to healthcare reduces the turnaround time for test results, improves patient outcomes, and enhances overall healthcare efficiency.

The global POC Immunoassay Analyzer market size was estimated at USD 51.2 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.70% during the forecast period.
