Abstracts

Pocket MIFI is a portable wireless Internet access device, with a built-in SIM card or eSIM chip, which can convert mobile network signals (4G/5G) into WiFi hotspots for sharing with mobile phones, tablets, notebooks and other terminals. Its core features are that it is ready to use and can be carried with you, making it suitable for travel, outdoor or temporary network demand scenarios. Some models support multi-device connection, large-capacity battery life, or manage traffic through APP, which solves the problem of traditional broadband being immovable and mobile hotspots consuming power quickly, and is a lightweight solution for flexible Internet access. By converting cellular network signals into personal WiFi hotspots, Pocket MIFI not only provides the convenience of network connection, but also expands the possibility of wireless Internet access. With the development of technology, future Pocket MIFI devices will be lighter, faster and have more intelligent functions, adding more convenience to users' mobile life. Pocket MIFI has gradually developed from the 3G network era to the 4G and 5G networks. The equipment that converts network signals into WiFi signals has largely met the network needs of business people and tourists who need to work on the go. The development of Pocket MIFI has mainly gone through three generations of products. The first generation is a Pocket MIFI plugged into the USB interface of a computer. Its principle is to share the wired broadband to form a temporary wireless network and share it with other wireless terminal devices. The second generation is a Pocket MIFI presented in the form of a Sim card. It is mainly used to apply for traffic cards through the three major operator platforms for Internet access. But now mobile phones all have the function of sharing hotspots. The second generation of Pocket MIFI reforms has begun to be gradually eliminated, and the third generation of Pocket MIFI has continued to derive. The third generation of Pocket MIFI is a Pocket MIFI with a power bank function, and no Sim card is required. It has a built-in communication chip, and automatically selects the network with the best signal to connect to the Internet

according to the signal strength of the operator at the location. Through the hotspot method, multiple devices can be connected to the Internet at the same time, with high-speed Internet access throughout the process, unlimited traffic and no speed reduction. Pocket MIFI can also provide charging functions for wireless terminal devices such as mobile phones to solve the problem of battery life. This type of Pocket MIFI is also the most popular Pocket MIFI on the market. At the beginning of 2020, the COVID-19 epidemic broke out, and domestic and foreign travel was restricted. The Pocket MIFI industry reached a historical freezing point. In 2022, the epidemic subsided, and the global travel and tourism industry grew explosively. The Pocket MIFI industry also ushered in a period of rapid development. In 2024, the global Pocket MIFI industry market size reached US\$6.1 billion, an increase of 19.9% over 2023. Among them, Asia-Pacific is the world's largest market region, especially China, Japan, South Korea, Australia and Southeast Asian countries, with the booming tourism industry, the growth rate far exceeds that of Europe and the United States. There are great differences in the operation modes of Pocket MIFI in different regions of the world. In China, the main income comes from the equipment itself and the subsequent traffic renewal, while other countries such as Japan and South Korea mainly charge rental fees for overseas tourists through the rental of Pocket MIFI, and generally do not directly sell the product itself. In terms of income, the income from physical products is far lower than the service income such as traffic rental and renewal. In the current competitive landscape of the Pocket MIFI industry, the core manufacturers mainly include ZTE, Huawei, Beijing Zhongyuan Yishang Technology, Gexing Technology, Vision Inc, TP-LINK, Telecom Square, NETGEAR, Telstra, Inseego, SK Telecom, Vodafone, SIMO Corporation, Optus, Global Roaming (Beijing) Technology, KT Co., Ltd, Mobile Planning (Benefit Japan), Ucloudlink Group, FSMobile (FUJISOFT), LG Uplus Corp, TravelWifi, Wuhan Baoji Electronic Technology, Tianjin RoamWiFi Technology, Inbound Platform Corp., My Webspot, etc. According to our data, in 2024, the world's first-tier manufacturers are mainly ZTE, Huawei, and Beijing Zhongyuan Yishang Technology, and the first-tier manufacturers account for about 20.77% of the market share; the second-tier manufacturers are Gexing Technology, Vision Inc, TP-LINK, Telecom Square, NETGEAR, Telstra, etc., with a total share of 13.43%. Although the market has undergone years of development and the products seem to have matured, the focus of competition is still limited to shallow dimensions such as price, appearance design, and additional functions, as well as fierce competition for marketing minds. Many brands mostly use "public version" solutions in terms of product motor performance and process details, lacking differentiated innovation. It is expected that industry competition will become more intense in the next few years, especially in the Chinese market. The use scenarios of Pocket MIFI are very wide. Tourism and business travel occupy a large market share. According to our data, the tourism and business

travel market size in 2024 is about US\$2.3 billion. In addition to common scenarios such as travel and business trips, it is also suitable for users who are temporarily unable to obtain fixed broadband services. In some temporary activities or on-site reports, Pocket MIFI devices can also play an important role, providing stable network connections for multiple devices on site to ensure the smooth progress of the activities. In addition, the proportion of Pocket MIFI as a home network source is also increasing year by year. The Pocket MIFI industry is in a stage of rapid change and deep integration, and its development is driven by multiple factors such as technology iteration, market demand differentiation and policy guidance. From the current situation of the industry, the market competition pattern shows the characteristics of coexistence of head concentration and emerging brands. Head companies such as ZTE and Huawei occupy a dominant position with their technology and reputation accumulation. At the same time, small and medium-sized brands enter the market segment through differentiated positioning, forming a multi-level competition situation. On the technical level, the integrated application of 5G and Wi-Fi 6 technologies significantly improves device performance, not only achieving breakthroughs in transmission rate and stability, but also extending battery life through low-power design. However, limited by the base station coverage density and tariff model, the popularization of 5G devices still needs time to verify. In terms of application scenarios, it extends from a single mobile scenario to a diversified ecosystem. In addition to traditional home entertainment, travel and business, the demand for emerging scenarios such as medical care, education, transportation and logistics is growing rapidly, driving the evolution of device functions towards modularization and customization.

The global Pocket MIFI market size was estimated at USD 6079.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 18.30% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Pocket MIFI market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.

The insights provided enable readers to understand the competitive dynamics within the industry and formulate effective strategies to enhance profitability and market positioning. Additionally, the report presents a clear framework for evaluating the current status and future outlook of business organizations operating in this sector.

A significant focus of this report lies in the competitive landscape of the global Pocket MIFI market. It offers detailed profiles of major players, including their market shares, performance metrics, product portfolios, and operational status. This enables stakeholders to identify leading competitors and gain a nuanced understanding of market rivalry and structure.

In summary, this report serves as an essential resource for industry participants, investors, researchers, consultants, and business strategists, as well as anyone planning to enter or expand their presence in the Pocket MIFI market.

Global Pocket MIFI Market: Market Segmentation Analysis

This research report provides a detailed segmentation of the market by region (country), key manufacturers, product type, and application. Market segmentation divides the overall market into distinct subsets based on factors such as product categories, end-user industries, geographic locations, and other relevant criteria.

A clear understanding of these market segments enables decision-makers to tailor their product development, sales, and marketing strategies more effectively to meet the unique needs of each segment. Leveraging market segmentation insights can significantly enhance targeted approaches, optimize resource allocation, and accelerate product innovation cycles by aligning offerings with the specific demands of diverse customer groups.

Chapter Outline

Chapter 1 mainly introduces the statistical scope of the report, market division standards, and market research methods.

Chapter 2 is an executive summary of different market segments (by region, product type, application, etc), including the market size of each market segment, future development potential, and so on. It offers a high-level view of the current state of the Pocket MIFI Market and its likely evolution in the short to mid-term, and long term.

Chapter 3 makes a detailed analysis of the market's competitive landscape of the market and provides the market share, capacity, output, price, latest development plan, merger, and acquisition information of the main manufacturers in the market.

Chapter 4 is the analysis of the whole market industrial chain, including the upstream and downstream of the industry, as well as Porter's five forces analysis.

Chapter 5 introduces the latest developments of the market, the driving factors and restrictive factors of the market, the challenges and risks faced by manufacturers in the industry, and the analysis of relevant policies in the industry.

Chapter 6 provides the analysis of various market segments according to product types, covering the market size and development potential of each market segment, to help readers find the blue ocean market in different market segments.

Chapter 7 provides the analysis of various market segments according to application, covering the market size and development potential of each market segment, to help

readers find the blue ocean market in different downstream markets.

Chapter 8 provides a quantitative analysis of the market size and development potential of each region and its main countries and introduces the market development, future development prospects, market space, and capacity of each country in the world.

Chapter 9 shares the main producing countries of Pocket MIFI, their output value, profit level, regional supply, production capacity layout, etc. from the supply side.

Chapter 10 introduces the basic situation of the main companies in the market in detail, including product sales revenue, sales volume, price, gross profit margin, market share, product introduction, recent development, etc.

Chapter 11 provides a quantitative analysis of the market size and development potential of each region in the next five years.

Chapter 12 provides a quantitative analysis of the market size and development potential of each market segment in the next five years.

Chapter 13 is the main points and conclusions of the report.

Key Reasons to Buy this Report:

Access to date statistics compiled by our researchers. These provide you with historical and forecast data, which is analyzed to tell you why your market is set to change

This enables you to anticipate market changes to remain ahead of your competitors

You will be able to copy data from the Excel spreadsheet straight into your marketing plans, business presentations, or other strategic documents

The concise analysis, clear graph, and table format will enable you to pinpoint the information you require quickly

Provision of market value data for each segment and sub-segment

Indicates the region and segment that is expected to witness the fastest growth as well as to dominate the market

Analysis by geography highlighting the consumption of the product/service in the region as well as indicating the factors that are affecting the market within each region

Competitive landscape which incorporates the market ranking of the major players, along with new service/product launches, partnerships, business expansions, and acquisitions in the past five years of companies profiled

Extensive company profiles comprising of company overview, company insights,

product benchmarking, and SWOT analysis for the major market players

The current as well as the future market outlook of the industry concerning recent developments which involve growth opportunities and drivers as well as challenges and restraints of both emerging as well as developed regions

Includes in-depth analysis of the market from various perspectives through Porter's five forces analysis

Provides insight into the market through Value Chain

Market dynamics scenario, along with growth opportunities of the market in the years to come

6-month post-sales analyst support

1 RESEARCH METHODOLOGY AND STATISTICAL SCOPE

1.1 Market Definition and Statistical Scope of Pocket MIFI

1.2 Key Market Segments

1.2.1 Pocket MIFI Segment by Type

1.2.2 Pocket MIFI Segment by Application

1.3 Methodology & Sources of Information

1.3.1 Research Methodology

1.3.2 Research Process

1.3.3 Market Breakdown and Data Triangulation

1.3.4 Base Year

1.3.5 Report Assumptions & Caveats

2 POCKET MIFI MARKET OVERVIEW

2.1 Global Market Overview

2.2 Market Segment Executive Summary

2.3 Global Market Size by Region

3 POCKET MIFI MARKET COMPETITIVE LANDSCAPE

3.1 Company Assessment Quadrant

3.2 Global Pocket MIFI Product Life Cycle

3.3 Global Pocket MIFI Revenue Market Share by Company (2020-2025)

3.4 Pocket MIFI Market Share by Company Type (Tier 1, Tier 2, and Tier 3)

3.5 Headquarters, Areas Served, and Product Types of Major Players

3.6 Pocket MIFI Market Competitive Situation and Trends

3.6.1 Pocket MIFI Market Concentration Rate

3.6.2 Global 5 and 10 Largest Pocket MIFI Players Market Share by Revenue

3.6.3 Mergers & Acquisitions, Expansion

4 POCKET MIFI VALUE CHAIN ANALYSIS

4.1 Pocket MIFI Value Chain Analysis

4.2 Midstream Market Analysis

4.3 Downstream Customer Analysis

5 THE DEVELOPMENT AND DYNAMICS OF POCKET MIFI MARKET

5.1 Key Development Trends

5.2 Driving Factors

5.3 Market Challenges

5.4 Industry News

5.4.1 New Product Developments

5.4.2 Mergers & Acquisitions

5.4.3 Expansions

5.4.4 Collaboration/Supply Contracts

5.5 PEST Analysis

5.5.1 Industry Policies Analysis

5.5.2 Economic Environment Analysis

5.5.3 Social Environment Analysis

5.5.4 Technological Environment Analysis

5.6 Global Pocket MIFI Market Porter's Five Forces Analysis

6 POCKET MIFI MARKET SEGMENTATION BY TYPE

6.1 Evaluation Matrix of Segment Market Development Potential (Type)

6.2 Global Pocket MIFI Market by Type (2020-2025)

6.3 Global Pocket MIFI Market Size Growth Rate by Type (2021-2025)

7 POCKET MIFI MARKET SEGMENTATION BY APPLICATION

7.1 Evaluation Matrix of Segment Market Development Potential (Application)

7.2 Global Pocket MIFI Market Size (M USD) by Application (2020-2025)

7.3 Global Pocket MIFI Market Size Growth Rate by Application (2021-2025)

8 POCKET MIFI MARKET SEGMENTATION BY REGION

8.1 Global Pocket MIFI Market Size by Region

8.1.1 Global Pocket MIFI Market Size by Region

8.1.2 Global Pocket MIFI Market Size Market Share by Region

8.2 North America

8.2.1 North America Pocket MIFI Market Size by Country

8.2.2 U.S.

8.2.3 Canada

8.2.4 Mexico

8.3 Europe

8.3.1 Europe Pocket MIFI Market Size by Country

8.3.2 Germany

8.3.3 France

8.3.4 U.K.

8.3.5 Italy

8.3.6 Spain

8.4 Asia Pacific

8.4.1 Asia Pacific Pocket MIFI Market Size by Region

8.4.2 China

8.4.3 Japan

8.4.4 South Korea

8.4.5 India

8.4.6 Southeast Asia

8.5 South America

8.5.1 South America Pocket MIFI Market Size by Country

8.5.2 Brazil

8.5.3 Argentina

8.5.4 Columbia

8.6 Middle East and Africa

8.6.1 Middle East and Africa Pocket MIFI Market Size by Region

8.6.2 Saudi Arabia

8.6.3 UAE

8.6.4 Egypt

8.6.5 Nigeria

8.6.6 South Africa

9 KEY COMPANIES PROFILE

9.1 ZTE

9.1.1 ZTE Basic Information
