Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Pof Cross-Linked Heat Shrinkable Film competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. POF cross-linked heat shrinkable film is a high-strength heat shrinkable packaging film made of polyolefin as the main raw material through multi-layer co-extrusion technology. It is then cross-linked by electron beam (EB) to permanently modify its molecular structure, significantly improving the tensile strength, puncture resistance, thermal stability and shrinkage uniformity of the film.
