Abstracts

Polycarbonate (PC) is a polymer with carbonate groups in its molecular chain. Polycarbonate is known as bulletproof adhesive due to its excellent mechanical properties. It has the characteristics of high mechanical strength, wide temperature range, good electrical insulation performance (but no change in arc resistance), good dimensional stability, and good transparency. Widely used in car lights and other fields. PC accounts for about 50% of plastic materials in headlights, mainly used in the interior mirrors, aluminum plated decorative parts, and exterior mirrors of headlights and fog lights. The adhesion between PC and aluminum plating layer is very good, and aluminum plating can be directly applied to PC substrate.
